

Features & Benefits

Customer Benefit	Feature	Why
Ease of Operation and Driver Comfort	Overall Design	Able to move trailers without climbing up and down from cab.
Ease of Operation	Hydraulic Fifth Wheel	Eliminates need to crank landing gear up and down when moving trailer, saving time and effort.
Ease of Operation	Ross & Sheppard Integral Power-assisted Steering with Mechanical Backup, Short Wheelbase and 45 Degree Wheel Cut	Makes trailer move quick, agile and easy to maneuver in tight spaces.
Ease of Operation	Sliding Back Door	Allows operator to easily get to and from trailer connections.
Ease of Operation	Extended Mirrors	Provide view of trailer sides and rear for accurate spotting of trailers.
Ease of Operation	Large Windows, Tapered Right Deck and Bumper	Provide excellent visibility in every direction.
Ease of Operation	Removable Heater Filter	Keeps dust away from heater and provides cleaner air intake into the cab.
Ease of Operation	Wide, Self-cleaning Steel Grate Steps, Large Grab Handles and Low Ride Height	Aids driver in ease of entry and egress of trailer mover.
Ease of Operation	12" Formed Channel Frame with "L" Frame Reinforcement	Constructed for stability when moving fully loaded trailers
Ease of Operation	Wide, Well-lit Working Platform	Provides maximum access to air lines.
Ease of Operation	Rear Drive Axle Bolted Directly to Frame	Provides stability under load.
Driver Comfort	Raised Roof Cab	Easy entrance and egress.
Driver Comfort	Half Cab Design with Large Windows and Sidewalls close to Operator	Provides maximum visibility while minimizing blind spots.
Driver Comfort	Side Vent	Increased air flow
Driver Comfort	Optional Integral Air Conditioning with Filter	No on-top cab mounting and excellent air distribution.

Features & Benefits

Customer Benefit	Feature	Why
Cost Effective	High Torque, Low Horsepower Diesel Engine and Low Rear Axle Ratio	Enables quick, agile operation at low speeds and provides excellent fuel economy.
Cost Effective	Automatic Transmission	Engineered for longevity and easy operation.
Cost Effective	Heavy-duty Driveline	Provides stability and durability.
Improved Productivity	Unique Design	Allows an average driver to move three trailers in the time it takes to move one with an over-the-road tractor.
Product Durability	Eurothane Paint	Holds new truck finish in all types of conditions.
Product Durability	Bolted in Crossmember	Protects fifth wheel boom bearings, engine and transmission mounts from torsional stress.
Product Durability	Galvannealed Side Panels and Aluminum Rear Sliding Door	Protects from rust.
Product Durability	Recessed Headlamps	Reduces accidental damage.
Product Durability	Heavy Duty 16.5" x 5" Brakes	Improves braking effort. Larger braking surface and longer brake life.
Product Durability	Frame Mounted Air Cleaner	Protects cleaner from engine vibration.
Product Durability	"O" Ring Hydraulic Fittings	Reduced Leakage
Low Maintenance	Electric Cab Tilt	Easy accessibility to major components.
Low Maintenance	Color and Number Coded Modular Wiring Looms	Easy to identify and locate electrical problems.
Low Maintenance	Heavy-duty Double Boom Bearings with Grease Groove	Allows for complete lubrication distribution.
Product Flexibility	Standardized Frame Configuration	Allows maximum flexibility for options.

Features & Benefits

Customer Benefit	Feature	Why
Product Flexibility	Patented Universal Engine and Transmission Mounts	Allows flexibility of power trains.
Product Support	Largest Dealer Network in the Industry	Assures parts and service availability, increasing uptime.
Product Support	Operator Orientation CD	First manufacturer to offer a tool to assist in driver training.
Great Investment	Kalmar Offers More Standard Features	Thousands of dollars in features are standard over competitive units.
Great Investment	Highest Resale Value	When you trade in your Kalmar Terminal Tractor, you will see that your investment has really paid off.

Exclusive Features & Benefits

FEATURE	BENEFIT
Heavy Duty Formed Mainframe	Durability and Extended Life
Pre-Drilled Frame Be Easily Installed or Retrofitted in Field	Consistent Location of Options and Options Can
Integral Front Tow Hooks Cut Into Frame	Strength, & Ease of Towing
Seat Position	Efficient & Comfortable Operator Position
Conveniently Located Operator Controls	Easy Accessibility for Operator
Modular Dash Panels	Easy Accessibility for Repair
Patented 3-Point Air Ride Cab Suspension (Field Retrofit available for 4-Point Mount)	Comfortable Ride & Low Maintenance Cost
Power Steering with Mechanical Backup	Good Maneuverability and control in the event of a Power System Failure
Three Part Right Side Sliding Window	Improved Visibility, No Center Post
Preformed Left Side Step and Catwalk	Secure Entry
Insulated Engine & Operator's Compartment	Reduces Noise and Heat in Cab
Exhaust Heat Shield	Protects Against Injuries
Stainless Steel Lower Door Tracks	Reduces Wear & Corrosion
Galvanealed Cab Panels & Columns	High Strength & Reduced Corrosion
Baked-On Cab Finish	Durable Long Lasting Cab Finish
Powder Coated Frame	Reduced Corrosion
Cab & Deck Undercoating	Reduces Noise & Corrosion
Universal Wiring Harness	Standardized For All Options
Weather Protected Wiring	Reduced Corrosion
Remote Mounted Vent Tubes for: Air Release Cylinder & Hydraulic Breather	Lower Maintenance
